EXPERIENCE

DevOps Engineer
Horace Mann Educators Corporation

📅 May 2016 – Ongoing   📍 Springfield, Illinois

- Lead Chef developer, responsible to deploying infrastructure as code
- Jenkins and BuildMaster Release Engineer, responsible for providing automated pipelines from TFS to Production

PROJECTS

Property Casualty Modernization
Horace Mann

📅 Ongoing

There is a lot of work to be done when it comes to mordernizing technologies at Horace Mann. I have been given the opportunity to assist with this modernization by providing infrastructure deployments using technologies such as Chef and Vagrant, as well as creating and maintaining .NET application deployment pipelines using tools such as Jenkins and BuildMaster. In this project, I have had to work with many other assorted technologies as well, including but not limited to: Java, Tomcat, Apache, AWS, EC2, S3, CloudFormation, etc.
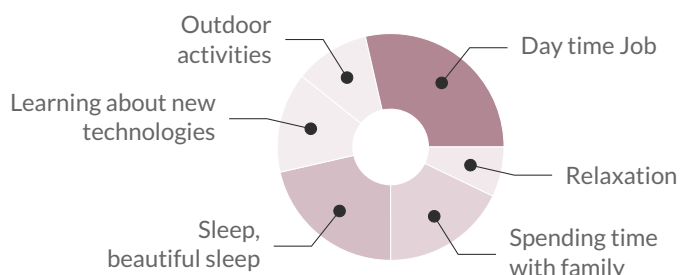

.NET Application CI/CD for Legacy Apps
Horace Mann

📅 Ongoing

There are many legacy in-house applications that need to be automated from a deployment perspective. I have been tasked with working closely with the application developers to convert their development process to a more modern, automated process. This includes helping create configuration management scripts written mainly in PowerShell that assist in variable replacement, as well as scripts to move compiled code from the TFS build server all the way to Production.

A DAY OF MY LIFE

- Outdoor activities
- Learning about new technologies
- Sleep, beautiful sleep
- Day time Job
- Relaxation
- Spending time with family

MY LIFE PHILOSOPHY

"You have to be willing to embrace your failures and learn from them in order to achieve success. Work hard and do not give up at the first sign of failure."

MOST PROUD OF

🏆 **Ruby FileShare Library**
I wrote a FileShare helper library in Ruby to determine whether to pull assets from a local repository or S3 depending on which subnet the server resides.

❤ **GuideWire Implementation**
Using Chef, I was able to greatly assist in provisioning servers with an initial GuideWire install.

STRENGTHS

Excellent work ethic   Great personality   Passion for learning

Ruby   PowerShell   Chef   Vagrant   Jenkins   BuildMaster   AWS
